PROFESSIONAL SUMMARY

Life sciences strategy and analytics professional with experience across biotech commercialization, healthcare product strategy, venture diligence, and scientific research. Combines primary and secondary research with quantitative and qualitative analysis to structure ambiguous questions, identify market and stakeholder insights, and deliver actionable recommendations on pricing, launch, growth, and portfolio decisions.

EXPERIENCE

Research Associate

2026 - Present

University of Illinois Urbana-Champaign - Long Lab | Champaign, IL

- Structured a reproducible analysis workflow for 12 single-nucleus RNA-seq samples across 2 species and both sexes, standardizing QC, background correction, doublet detection, and integration in Python/AnnData for cross-cohort comparison.
- Converted an ambiguous research objective into defined workstreams, decision criteria, timelines, and collaborator-ready documentation; proactively validated 1 sample end-to-end and surfaced pipeline risks before scaling across all 12 samples.

Business Development Associate

2025 - 2026

Boston Bioprocess | Champaign, IL

- Generated ~\$4M in sales within 7 months and signed 4 biopharma clients, independently advancing opportunities from technical discovery and needs assessment through solution scoping, pricing, contracting, and project handoff.
- Identified pharma as a priority growth segment through secondary research and customer insights; built segment-specific positioning, value propositions, and commercialization strategy to support market entry.
- Translated client requirements into scopes, timelines, equipment plans, risks, and cross-functional deliverables for scientific and process teams; established CRM and pricing workflows supporting a >\$3M pipeline.

Product Commercialization Consultant

2024 - 2025

Medical-device company | Berkeley, CA

- Conducted 30+ primary interviews and reviewed 50+ patents alongside competitor, pricing, and clinical-workflow evidence to map stakeholder needs, market dynamics, adoption barriers, and US commercialization potential.
- Synthesized qualitative and quantitative findings into a recommendation against near-term launch due to weak differentiation, preventing further investment while defining target segments, requirements, and roadmap priorities.

Co-Founder

2024 - 2025

ChemoMicrobiome | San Francisco, CA

- Led 40+ interviews with patients, clinicians, researchers, and healthcare stakeholders to define unmet needs, stakeholder behavior, and access/adoption barriers; converted insights into target users, pricing hypotheses, and value strategy.
- Structured launch and growth workstreams across clinical need, scientific feasibility, competitive landscape, and commercialization; tested recommendations through Nucleate and NSF I-Corps, helping reach finalist status in 2 pitch competitions.

Venture Capital Analyst

2024 - 2025

Speciale Invest - Deep Tech VC Fund | Bangalore, India

- Evaluated early-stage biotech and quantum companies using market sizing, secondary research, competitive intelligence, customer-problem analysis, technical diligence, and business-model assessment.
- Led diligence on 1 liquid-biopsy company across 6 areas - product, users, data, regulation, pricing/business model, and GTM - then synthesized founder, clinician, and expert evidence into risks, open questions, and an investment perspective for fund leadership.

EDUCATION

University of California, Berkeley | MEng, Bioengineering & Engineering Management

2024 - 2025

GPA: 3.83/4.00 | Fung Excellence Scholar (Top 5%)

PES University | BTech, Biotechnology | GPA: 3.85/4.00

2019 - 2023

SKILLS

Healthcare Strategy: Market Access Fundamentals, Commercialization, Pricing & Value Strategy, Product Launch & Commercial Readiness, Growth & Portfolio Strategy, Customer & Stakeholder Engagement

Research & Analytics: Primary & Secondary Research, Quantitative & Qualitative Analysis, Market Sizing, Competitive Intelligence, Voice of Customer, Stakeholder Interviews, Market Dynamics, Access & Adoption Barriers, Insight Synthesis

Consulting Execution: Structured Problem Solving, Strategic Recommendations, Executive-Ready Presentations, Workstream/Timeline/Risk Management, Client-First Delivery, Relationship Building, Cross-Functional Collaboration, Excel, SQL, Python, Tableau, Salesforce, HubSpot
